

South Nassau Communities Hospital protects its valuable data and patient information with Somansa Mail-i

South Nassau Communities Hospital is a 429-bed, acute care hospital located in Oceanside, NY. For almost 75 years, the Hospital has been committed to providing inpatient, ambulatory, home health, restorative, preventive and emergency medical care to Long Islanders. With more than 820 physicians, South Nassau offers a broad range of services, excels in cancer and cardiac care, and provides comprehensive diagnosis, treatment, rehabilitation and support services.

As a hospital, South Nassau Communities Hospital is required to comply with U.S. federal regulations and industry laws such as the Health Insurance Portability and Accountability Act (HIPAA) and e-Discovery. South Nassau Communities Hospital is a well respected hospital at the center of a health care renaissance focused on the health and well-being of its patients.

After evaluating several other solutions, South Nassau Communities Hospital selected Somansa's Mail-i to identify and protect confidential company and patient information. In preparation and my interpretation of e-Discovery and HIPAA regulations, we were looking for a solution that would capture non corporate mail communications such as; webmail, POP mail, IM, etc. In searching, I came across Somansa's Mail-i product which allowed us to review on a periodic basis and scan for PHI and/or business confidential from exiting our organization. This allows us the ability to track down if and when a violation has occurred and to take action on those violations," said Connor Brosnahan, Director/Network Manager for South Nassau Communities Hospital. We needed a solution that would protect our data and meet compliance and regulatory rules."

Using Somansa's Mail-i, South Nassau Communities Hospital protects its confidential company data supporting over 2100 employees along with thousands of patient's information. Mail-i secures 's data by monitoring all outgoing electronic communication including corporate email, web-based email, instant messenger, FTP, and P2P protocols. Once a Mail-i policy is violated, administrators are immediately alerted. All of South Nassau Communities Hospital's electronic messages including attached files are archived and retrievable using Mail-i's quick search option to comply with federal and industry regulations and e-Discovery rules.

Product:

- Mail-i

Mail-i Benefits:
